EDUCATION

New York University, College of Arts & Science, New York, NY — May 2028
Bachelor of Arts, Data Science
Overall GPA: 3.91

EXPERIENCE

AI Web Designer & Prompt Engineering Intern, **JGM Innovation,** Lindenhurst, NY — Summer 2026

- Built and refined responsive UI components for an AI-powered web application using JavaScript, HTML, and CSS, improving frontend functionality and user experience.
- Developed and tested reusable AI prompt workflows for chatbot features, debugging edge cases and expanding support across multiple application use cases.
- Collaborated in an Agile Scrum environment using Jira and participated in code reviews and feature discussions to support iterative product development.

Accounts Payable Assistant Intern, **Personal Touch,** Demopolis, AL — Summer 2025 & 2026

- Processed and organized 200+ financial records using Foundation accounting software, maintaining accurate account data and recurring workflows.

LEADERSHIP ACTIVITIES

Co-Director of Marketing, **Women in Data Science (WiDS), NYU Center for Data Science** — Aug. 2026 – Present

- Co-lead marketing initiatives and manage promotional content for NYU's Women in Data Science community, supporting outreach and engagement across events and programs.

Wellness Committee Staff Member, **NYU Proud to be First (P2B1)** — Aug. 2026 – Present

- Support wellness and community-building initiatives for first-generation students through collaborative events.

PROJECTS

Be1space, **Study Space Discovery Web App (link)** — Jan. 2026 – Present

- Built a full-stack study-space discovery web application using Next.js, React, FastAPI, and Supabase, enabling users to discover, filter, and save spaces.
- Integrated REST APIs, authentication, dynamic routing, and real-time data features while troubleshooting frontend/backend integration issues and collaborating through Git/GitHub.

HVAC Margin Rescue, **Datathon project (link)** — April 2026

- Built a full-stack HVAC risk-analysis application using React, Python, and FastAPI, connecting frontend and backend services through APIs for risk scoring and recommendations.
- Developed a user-facing dashboard that translated complex project data into prioritized risk indicators and actionable recommendations.

SKILLS

Programming: Python, Java, JavaScript, SQL, HTML/CSS
Frameworks & APIs: React, Next.js, FastAPI, REST APIs, Tailwind CSS
Development: Full-Stack Development, Git/GitHub, Agile/Scrum, Debugging, Code Reviews, Databases
AI & Tools: Supabase, Jira, Figma, Zapier, Google Apps Script
